KEYWORD INDEX

A

Actin — Genetic analysis of the cellularization of the *Drosophila* embryo, 15

Adenylate cyclase — Growth inhibition and the regulation of cyclic AMP by the triphenylethylene anti-estrogen tamoxifen in the quail oviduct, 181

Ag — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103

Ag-NOR — Cytochemical distinction of various nucleolar components in insect cells, 133

Amebiasis — The plasma membrane of *Entamoeba histolytica:* structure and dynamics, 189

Antigens — The plasma membrane of *Entamoeba histolytica:* structure and dynamics, 189

Anuran dermal tract — Fibrillar pattern of self-assembled and cell-assembled collagen: resemblance and analogy, 149

Atomic absorption spectrophotometry — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103

Axon — Ultrastructural changes in the shape of neurons and related structures in frog sympathetic ganglia after axotomy, 75

Axoplast — Cell division in the heliozoan *Dimorpha mutans* and evolution of centrosomal organization during the cell cycle, 51

Axotomy — Ultrastructural changes in the shape of neurons and related structures in frog sympathetic ganglia after axotomy, 75

B

Babesia divergens — Heat shock response of *Babesia divergens* and identification of the hsp70 as an immunodominant early antigen during ox, gerbil and human babesiosis, 93

Basal bodies — Centriole and basal body formation during ciliogenesis revisited, 31

Basal body polarity — Determination of ciliary polarity precedes differentiation in the epithelial cells of quail oviduct, 3

Basement membrane — Structure of the basement membrane of corneal epithelium: quick-freeze, deep-etch comparative study of networks deposited in culture and during development, 141

Blastoderm — Genetic analysis of the cellularization of the *Drosophila* embryo, 15

Blood group antigens — Analysis of the state of differentiation of two rat colon carcinoma clones with distinct tumorigenic properties, 239

C

c-*raf* proto-oncogene — *Xenopus* c-*raf* proto-oncogene: cloning and expression during oogenesis and early development, 39

Ca^{2+} — Effect of maitotoxin on sea urchin egg fertilization and on Ca^{2+} permeabilities of eggs and intracellular stores, 269

cAMP — Growth inhibition and the regulation of cyclic AMP by the triphenylethylene anti-estrogen tamoxifen in the quail oviduct, 181

cAMP phosphodiesterase — Growth inhibition and the regulation of cyclic AMP by the triphenylethylene anti-estrogen tamoxifen in the quail oviduct, 181

Cell cycle — *Xenopus* c-*raf* proto-oncogene: cloning and expression during oogenesis and early development, 39 — Changes in intracellular pH following egg activation and during the early cell cycle of the amphibian *Pleurodeles waltlii*, coincide with changes in MPF activity, 259

Cell proliferation — Growth inhibition and the regulation of cyclic AMP by the triphenylethylene anti-estrogen tamoxifen in the quail oviduct, 181

Cell ultrastructure — Cryofixation, cryosubstitution, cryo-embedding for visualizing of nuclear ultrastructure and for immunodetection in HeLa cells, 121

Cellularization — Genetic analysis of the cellularization of the *Drosophila* embryo, 15

Centrioles — Centriole and basal body formation during ciliogenesis revisited, 31 — *De novo* formation of centrioles in parthenogenetically activated, diploidized rabbit embryos, 61

Centrosome — Cell division in the heliozoan *Dimorpha mutans* and evolution of centrosomal organization during the cell cycle, 51

CHO cells — Gas N, Location of ribosomal genes in CHO cells; *in situ* hybridization with a non —isotopic DNA probe on G-banded chromosomes, 217

Chromatin decondensation — *In vivo* decondensation of chromatin and nucleolar fibrillar component by *Leucaena leucocephala* ingredient, 211

Cilia — Centriole and basal body formation during ciliogenesis revisited, 31

Ciliary differentiation — Determination of ciliary polarity precedes differentiation in the epithelial cells of quail oviduct, 3

Ciliary orientation — Determination of ciliary polarity precedes differentiation in the epithelial cells of quail oviduct, 3

Ciliates — Changes in the organization of the microfilamentous cortical cytoskeletal system during oral regeneration in *Climacostomum virens* (ciliate), 67

Ciliogenesis — Centriole and basal body formation during ciliogenesis revisited, 31

Clathrin — Subcellular distribution of clathrin in cultured hypothalamic neurons, 83

Collagen — Structure of the basement membrane of corneal epithelium: quick-freeze, deep-etch comparative study of networks deposited in culture and during development, 141 — Fibrillar pattern of self-assembled and cell-assembled collagen: resemblance and analogy, 149

Colon carcinoma — Analysis of the state of differentiation of two rat colon carcinoma clones with distinct tumorigenic properties, 239

Cord formation — Phenotypic modulations of human umbilical vein endothelial cells and human dermal fibroblasts using two angiogenic assays, 275

Cornea — Structure of the basement membrane of corneal epithelium: quick-freeze, deep-etch comparative study of networks deposited in culture and during development, 141

Cryofixation — Some applications of cryosubstitution in ultrastructural studies of the cell nucleus, 113 — Three-dimensional imaging of the mucus secretory process in the cryofixed frog respiratory epithelium, 159

Cryomethods — (3-Cryo) methods (cryofixation, cryosubstitution and cryoembedding) for processing of tissues for ultrastructural and immunocytochemical studies. Application to oviduct cells of laying quail, 167

Cryosubstitution — Some applications of cryosubstitution in ultrastructural studies of the cell nucleus, 113

Cu — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103

Cytochemistry — Cytochemical distinction of various nucleolar components in insect cells, 133
Cytokinesis — Genetic analysis of the cellularization of the *Drosophila* embryo, 15
Cytoskeleton — Determination of ciliary polarity precedes differentiation in the epithelial cells of quail oviduct, 3 — Genetic analysis of the cellularization of the *Drosophila* embryo, 15 — Changes in the organization of the microfilamentous cortical cytoskeletal system during oral regeneration in *Climacostomum virens* (ciliate), 67

D

3-D imaging — Three-dimensional imaging of the mucus secretory process in the cryofixed frog respiratory epithelium, 159
***De novo* formation** — *De novo* formation of centrioles in parthenogenetically activated, diploidized rabbit embryos, 61
Deuterosome — *De novo* formation of centrioles in parthenogenetically activated, diploidized rabbit embryos, 61
Development — Determination of ciliary polarity precedes differentiation in the epithelial cells of quail oviduct, 3 — DNAase activities in embryonic chicken lens: in epithelial cells or in differentiating fibers where chromatin is progressively cleaved, 231
Differentiation — Expression of the nuclear protein mitotin in differentiating *in vitro* HL 60 cells, 47
DNAase — DNAase activities in embryonic chicken lens: in epithelial cells or in differentiating fibers where chromatin is progressively cleaved, 231
Drosophila — Genetic analysis of the cellularization of the *Drosophila* embryo, 15

E

Electron microscopy — Structure of the basement membrane of corneal epithelium: quick-freeze, deep-etch comparative study of networks deposited in culture and during development, 141
Electron probe microanalysis — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103
EM cryotechniques — Cryofixation, cryosubstitution, cryo-embedding for visualizing of nuclear ultrastructure and for immunodetection in HeLa cells, 121
Embryonic lens — DNAase activities in embryonic chicken lens: in epithelial cells or in differentiating fibers where chromatin is progressively cleaved, 231
Entamoeba histolytica — The plasma membrane of *Entamoeba histolytica:* structure and dynamics, 189
Enzyme immunoassay — Subcellular distribution of clathrin in cultured hypothalamic neurons, 83
Epithelium — Centriole and basal body formation during ciliogenesis revisited, 31
Evolution — Serological characterization and partial purification of an Lyt-1 homolog in tunicate hemocytes, 249
Extracellular matrix — Structure of the basement membrane of corneal epithelium: quick-freeze, deep-etch comparative study of networks deposited in culture and during development, 141

F

Fibrillar center — Cytochemical distinction of various nucleolar components in insect cells, 133
Fibrillar pattern — Fibrillar pattern of self-assembled and cell-assembled collagen: resemblance and analogy, 149
Frog — Ultrastructural changes in the shape of neurons and related structures in frog sympathetic ganglia after axotomy, 75
Frog palate epithelium — Three-dimensional imaging of the mucus secretory process in the cryofixed frog respiratory epithelium, 159

G

Ganglion — Ultrastructural changes in the shape of neurons and related structures in frog sympathetic ganglia after axotomy, 75
Gene expression — Effects of testosterone on nuclear ribonucleoprotein components of prostate epithelial cells, 223

H

Heat shock response — Heat shock response of *Babesia divergens* and identification of the hsp70 as an immunodominant early antigen during ox, gerbil and human babesiosis, 93
Heliozoa — Cell division in the heliozoan *Dimorpha mutans* and evolution of centrosomal organization during the cell cycle, 51
Hemocytes — Serological characterization and partial purification of an Lyt-1 homolog in tunicate hemocytes, 249
HL 60 cells — Expression of the nuclear protein mitotin in differentiating *in vitro* HL 60 cells, 47
hsp70 — Heat shock response of *Babesia divergens* and identification of the hsp70 as an immunodominant early antigen during ox, gerbil and human babesiosis, 93
Human embryo — Nucleolar changes in human embryo during the pre-implantation stage. Activation of ribosomal genes during the nucleologenesis, 201

I

Immunocytochemistry — Subcellular distribution of clathrin in cultured hypothalamic neurons, 83 — Some applications of cryosubstitution in ultrastructural studies of the cell nucleus, 113
Immunolabeling — Cryofixation, cryosubstitution, cryo-embedding for visualizing of nuclear ultrastructure and for immunodetection in HeLa cells, 121 — (3-Cryo) methods (cryofixation, cryosubstitution and cryoembedding) for processing of tissues for ultrastructural and immunocytochemical studies. Application to oviduct cells of laying quail, 167
Immunology — Heat shock response of *Babesia divergens* and identification of the hsp70 as an immunodominant early antigen during ox, gerbil and human babesiosis, 93
Insect — Cytochemical distinction of various nucleolar components in insect cells, 133
Intracellular pH — Changes in intracellular pH following egg activation and during the early cell cycle of the amphibian *Pleurodeles waltlii,* coincide with changes in MPF activity, 259
***In situ* hybridization** — Gas N, Location of ribosomal genes in CHO cells; *in situ* hybridization with a non —isotopic DNA probe on G-banded chromosomes, 217
***In vitro* angiogenesis** — Phenotypic modulations of human umbilical vein endothelial cells and human dermal fibroblasts using two angiogenic assays, 275
Interphase — Effects of testosterone on nuclear ribonucleoprotein components of prostate epithelial cells, 223

L — M

Lymphocytes — Serological characterization and partial purification of an Lyt-1 homolog in tunicate hemocytes, 249
Lyt-1 — Serological characterization and partial purification of an Lyt-1 homolog in tunicate hemocytes, 249

Maitotoxin — Effect of maitotoxin on sea urchin egg fertilization and on Ca^{2+} permeabilities of eggs and intracellular stores, 269
Matrigel — Phenotypic modulations of human umbilical vein endothelial cells and human dermal fibroblasts using two angiogenic assays, 275

Membrane proteins — The plasma membrane of *Entamoeba histolytica:* structure and dynamics, 189
Metal storage — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103
Mitosis — Cell division in the heliozoan *Dimorpha mutans* and evolution of centrosomal organization during the cell cycle, 51
Mitotin — Expression of the nuclear protein mitotin in differentiating *in vitro* HL 60 cells, 47
MPF activity — Changes in intracellular pH following egg activation and during the early cell cycle of the amphibian *Pleurodeles waltlii*, coincide with changes in MPF activity, 259

N

Neuron — Subcellular distribution of clathrin in cultured hypothalamic neurons, 83
Non-actin microfilaments — Changes in the organization of the microfilamentous cortical cytoskeletal system during oral regeneration in *Climacostomum virens* (ciliate), 67
Nuclear pore complex — Assembly of nuclear pore complexes in *Xenopus* egg extract, 25
Nuclear pores — *In vivo* decondensation of chromatin and nucleolar fibrillar component by *Leucaena leucocephala* ingredient, 211
Nucleolar B-36 protein — (3-Cryo) methods (cryofixation, cryosubstitution and cryoembedding) for processing of tissues for ultrastructural and immunocytochemical studies. Application to oviduct cells of laying quail, 167
Nucleolus — Cytochemical distinction of various nucleolar components in insect cells, 133 — Nucleolar changes in human embryo during the pre-implantation stage. Activation of ribosomal genes during the nucleologenesis, 201
Nucleolus architecture — *In vivo* decondensation of chromatin and nucleolar fibrillar component by *Leucaena leucocephala* ingredient, 211
Nucleoskeleton — *In vivo* decondensation of chromatin and nucleolar fibrillar component by *Leucaena leucocephala* ingredient, 211
Nucleus — Some applications of cryosubstitution in ultrastructural studies of the cell nucleus, 113 — Cryofixation, cryosubstitution, cryo-embedding for visualizing of nuclear ultrastructure and for immuno-detection in HeLa cells, 121 — Effects of testosterone on nuclear ribonucleoprotein components of prostate epithelial cells, 223

O — P — Q

Ovalbumin — (3-Cryo) methods (cryofixation, cryosubstitution and cryoembedding) for processing of tissues for ultrastructural and immunocytochemical studies. Application to oviduct cells of laying quail, 167
Oviduct — Determination of ciliary polarity precedes differentiation in the epithelial cells of quail oviduct, 3

Parthenogenesis — *De novo* formation of centrioles in parthenogenetically activated, diploidized rabbit embryos, 61
Perichromatin granules — Effects of testosterone on nuclear ribonucleoprotein components of prostate epithelial cells, 223
***Pleurodeles* eggs** — Changes in intracellular pH following egg activation and during the early cell cycle of the amphibian *Pleurodeles waltlii*, coincide with changes in MPF activity, 259
Polyacrylamide gel electrophoresis — DNAase activities in embryonic chicken lens: in epithelial cells or in differentiating fibers where chromatin is progressively cleaved, 231
Promyelocytic leukemia cells — Expression of the nuclear protein mitotin in differentiating *in vitro* HL 60 cells, 47
Purification — Serological characterization and partial purification of an Lyt-1 homolog in tunicate hemocytes, 249

Quail oviduct — (3-Cryo) methods (cryofixation, cryosubstitution and cryoembedding) for processing of tissues for ultrastructural and immunocytochemical studies. Application to oviduct cells of laying quail, 167 — Growth inhibition and the regulation of cyclic AMP by the triphenylethylene anti-estrogen tamoxifen in the quail oviduct, 181

R

Rabbit — *De novo* formation of centrioles in parthenogenetically activated, diploidized rabbit embryos, 61
Rat — Analysis of the state of differentiation of two rat colon carcinoma clones with distinct tumorigenic properties, 239
Regeneration — Changes in the organization of the microfilamentous cortical cytoskeletal system during oral regeneration in *Climacostomum virens* (ciliate), 67
Respiratory mucus — Three-dimensional imaging of the mucus secretory process in the cryofixed frog respiratory epithelium, 159
Ribosomal genes — Nucleolar changes in human embryo during the pre-implantation stage. Activation of ribosomal genes during the nucleologenesis, 201
Ribosomal genes (RNR) — Gas N, Location of ribosomal genes in CHO cells; *in situ* hybridization with a non —isotopic DNA probe on G-banded chromosomes, 217

S

Sea urchin egg fertilization — Effect of maitotoxin on sea urchin egg fertilization and on Ca^{2+} permeabilities of eggs and intracellular stores, 269
Secretory process — Three-dimensional imaging of the mucus secretory process in the cryofixed frog respiratory epithelium, 159
Self assembly — Fibrillar pattern of self-assembled and cell-assembled collagen: resemblance and analogy, 149
Serendipity α — Genetic analysis of the cellularization of the *Drosophila* embryo, 15
Serine threonine kinases — *Xenopus* c-*raf* proto-oncogene: cloning and expression during oogenesis and early development, 39
Starch — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103
Steroid hormones — Effects of testosterone on nuclear ribonucleoprotein components of prostate epithelial cells, 223
Sympathetic neuron — Ultrastructural changes in the shape of neurons and related structures in frog sympathetic ganglia after axotomy, 75

T — U — X

Tamoxifen — Growth inhibition and the regulation of cyclic AMP by the triphenylethylene anti-estrogen tamoxifen in the quail oviduct, 181
Tetraselmis suecica — Response of the phytoplanctonic alga *Tetraselmis suecica* to copper and silver exposure: vesicular metal bioaccumulation and lack of starch bodies, 103
Tumorigenic variants — Analysis of the state of differentiation of two rat colon carcinoma clones with distinct tumorigenic properties, 239

Ultrastructure — Some applications of cryosubstitution in ultrastructural studies of the cell nucleus, 113 — (3-Cryo) methods (cryofixation, cryosubstitution and cryoembedding) for processing of tissues for ultrastructural and immunocytochemical studies. Application to oviduct cells of laying quail, 167

Xenopus — Assembly of nuclear pore complexes in *Xenopus* egg extract, 25
***Xenopus* development** — *Xenopus* c-*raf* proto-oncogene: cloning and expression during oogenesis and early development, 39
